

INSPECTION REPORT REVIEW
POTENTIAL HAZARDOUS WASTE SITE

SITE NAME : Larry Landry Dump
LOCATION : Intracoastal City, LA
SITE NUMBER: LAD985169804
SURVEY DATE: 12/11/90 INSPECTED BY: STATE (PIT) TAT OTHER: _____
LABORATORY : CLP ✓ EPA OTHER _____

RECEIVED FROM: ED SIERRA DATE RECEIVED: 10/2/91

SAMPLE TYPE(s):

SOIL	SURFACE WATER	GROUND WATER	DRINKING WATER
off <u>Non</u> site	off <u>Non</u> site	off / on -site	off / on -site

CONTAMINANT(s): Organics Inorganics Radionuclides Microbiological

FOLLOW UP (Y/N):

<u>N</u> (Re)Sampling Requested	<u>N</u> Locate Drinking Water Sources
<u>N</u> Further Action is URGENT	<u>N</u> Keep Site Active ("N"=No Further Action)
	<u>Y</u> Concur with Report Recommendations

SUMMARY:

The site was leased to Mr. Larry Landry by (b) (6) (b) (6), the owner. It was in operation in the early 1980's until (b) (6) (b) (6) effectively shut down operations by raising the rent. A twenty foot deep clay layer lies immediately under the site which should help to protect the local groundwater from contamination. The surface water pathway is a more likely route to contamination. Although there are no reported drinking water sources along the Vermilion River, where the surface runoff would flow, there is a potential for a vast area of crawfish farming. Contaminants such as heavy metals, can bioaccumulate in fish and seafood, which can be later be consumed, causing human exposure.
